VAPING

WHAT'S BEING ADDED?

Nebraska
Elks Association

**IF YOU HAVE SEEN A PRESENTATION ON VAPING IN THE PAST
PLEASE RAISE YOUR HAND**

WOULD YOU RATHER SEE SOMETHING NEW?

**Nebraska
Elks Association**

VAPING DEVICE MANUFACTURERS ARE EVOLVING.

OUR PRIMARY FOCUS IS SLOWLY SHIFTING AWAY FROM NICOTINE.
YES, EXPLAINING THE DANGERS OF NICOTINE IS STILL IMPORTANT.
HOWEVER...TODAY I WANT TO SHOW YOU A NEW PROBLEM WITH VAPING.

TODAYS DEVICES ARE A LOT MORE SINISTER THAN YOU MAY THINK.

THE FOLLOWING SLIDES MAY BE EYE OPENING TO THOSE WHO
THOUGHT THEY KNEW WHAT PEOPLE WERE VAPING THESE DAYS.

INGREDIENTS TO WATCH FOR AND BEWARE OF

AMANITA – Mushroom Muscaria – Psilocybin Mushrooms – Hallucinogen

TIANEPTINE – Tia, Tianna, Neptune & Pegasus - Antidepressant

KAVA - Piper Methysticum – Ceremonial plant - Very bad withdrawals

PHENIBUT – Beta-Phenyl – GABA – Potentiator – Increases effects of other drugs

ASHWAGANDHA -- Ashwagandha has been in use as a medicinal plant for thousands of years

THC SYNTHETICS – **Delta 8**, Delta 9, Delta 10 & **Delta 11**

THC-A, THC-O, THC-P, THC-V & HHC

As per the 2018 Farm Bill, any product produced from hemp plants which contains less than 0.3% Of Delta 9 THC by weight can be distributed without any restrictions or oversight.

SO ----- WHO GUARANTEES <0.3%?

NICOTINE SALTS – Nic Salt, Salt Nicotine – Synthetic, stronger than natural nicotine

**BEWARE: These items are being sold as Mood Enhancers or Dietary Supplements.
What that really means is: "Street Legal Drugs of Abuse".**

AMANITA

The genus Amanita contains about 600 species of agarics, including some of the most toxic known mushrooms found worldwide, as well as some well-regarded edible species.

Scientific name: Amanita

Kingdom: Fungi

Family: Amanitaceae

Genus: Amanita

SYMPTOMS – SIDE EFFECTS

Depending on habitat and the amount ingested per body weight, effects can range from mild nausea and twitching to drowsiness, cholinergic crisis-like effects (low blood pressure, sweating and salivation), auditory and visual distortions, mood changes, euphoria, relaxation, ataxia (impaired balance and coordination), and loss of equilibrium (like with tetanus.)

Nebraska

TIANEPTINE

“GAS STATION HEROIN”

Tianeptine is a prescription drug used for depression in some European, Asian, and Latin American countries. **It is not approved for use in the US.** Tianeptine affects brain chemicals. It seems to affect mood when used in low doses.

SYMPTOMS – SIDE EFFECTS

Nausea, Abdominal pain, Constipation, Headache, Agitation, Rapid heartbeat, High blood pressure, Drowsiness.

KAVA - PIPER METHYSTICUM

- Kava or kava kava is a crop of the Pacific Islands. The name kava is from Tongan and Marquesan, meaning 'bitter'; other names for kava include 'awa, 'ava, yaqona or yagona, sakau, seka, and malok or malogu. Ceremonial plant.
- Family: Piperaceae
- Genus: Piper

SYMPTOMS – SIDE EFFECTS

Allergic skin reactions (such as contact dermatitis), Dizziness, Drowsiness, Restlessness, Stomach upset, Tremors.

Nebraska

PHENIBUT

Phenibut (β -phenyl-aminobutyric acid) is a psychoactive substance still widely used to relieve tension, anxiety, alcohol withdrawal, stammering, and insomnia, and to potentiate neuroleptics and antiparkinsonian drugs. Developed in Russia in the 1960's.

SYMPTOMS – SIDE EFFECTS

Can cause many side effects, including reduced consciousness, dizziness, nausea, poor balance, and fatigue. Taking large doses can cause trouble breathing, unconsciousness, and death. Phenibut can cause dependence.

ZAZA SILVER

MAX

15 CAPSULES

Supplement Facts
 Serving Size: 1 Capsule
 Servings per container: 15

	Amount per serving	% of Daily Value
Proprietary Blend	700 mg	†
Tianeptine Sodium		
Phenibut		
Kana		

† Daily Values Not Established
 Other Ingredients: May contain vegetable capsules and vegetable stearate used in manufacturing.
Storage: Keep in a cool dry place

ASHWAGANDHA

It contains several bioactive compounds, including a group of substances known as withanolides. Withanolides have been associated with anti-inflammatory and antioxidant effects. Currently, ashwagandha supplements are often promoted for stress and anxiety, sleep, male infertility, and athletic performance.

SYMPTOMS – SIDE EFFECTS

Drowsiness, Stomach upset, Diarrhea, and Vomiting. Although it is rare, there have been a number of cases that link liver injury to ashwagandha supplements. Ashwagandha should be avoided during pregnancy and should not be used while breastfeeding. Ashwagandha is not recommended for people who are about to have surgery, or for those who have autoimmune or thyroid disorders. There is evidence that ashwagandha might interact with some medications, including those for diabetes and high blood pressure, medicines that decrease the immune system response (immunosuppressants), sedatives, anti-seizure medications (anticonvulsants), and thyroid hormone medications.

DELTA 8, 9, 10 & 11

Delta 8 and 10 are synthetic variations of Delta 9 -- The THC found in cannabis plants

DELTA 8 Uses – Panic attacks, Stress, Depression, Bipolar disorder, Chronic pain

Delta 8 Effects – Visual distortions, Euphoria, Relaxation, Difficulties with thinking and speaking

DELTA 9 Uses – Anxiety, Glaucoma, Insomnia, Low appetite, Muscle spasticity, Obstructive sleep apnea, Nausea, Pain

DELTA 9 Effects – Intoxication

DELTA 10 Uses – There is very little research on the benefits of Delta 10

DELTA 10 Effects – Red eyes, Dry mouth, Increased appetite, Difficulty thinking and speaking, Slowed reaction times, Anxiety, Rapid heart rate, Memory loss, Hallucinations, Vomiting, Tremors, Dizziness, Confusion, Loss of consciousness

THC

There are at least 20 different variations of THC

5 main types of THC:

THC-A, THC-P, THC-V, Delta 8, Delta 9

Other variations:

DELTA 10

Delta 6a-10a-THC

THC-B

THC-O-acetate

HHC hexahydrocannabinol – Known to cause seizures

GOO'D EXTRACTS

5 GRAM DISPOSABLES

- BLEND OF DELTA 8-THC, HXY 9-THC, THCP, THC-A & LIVE RESIN
